

THE ZERO-NOISE CAMPUS
OPPORTUNITY MARKETPLACE

NEXUS

PRODUCT STRATEGY BRIEF & INTERACTIVE FRAMEWORK | SENIOR CAPSTONE
SUBMISSION

Project Lifecycle: May
29 – June 13, 2026

PROBLEM DIAGNOSIS & SYSTEMIC ROOT CAUSE

The Fragmented Reality

- High-signal career updates get buried instantly in casual chat noise.
- **The Outcome:** High-stakes "Information FOMO" and missed deadlines for Senior Undergraduates.

The Structural Failure

- Existing campus channels treat data as a flat broadcast layer.
- Opportunities are distributed indiscriminately without structural classification (Branch, CGPA, Year).
- **The Bottleneck:** High cognitive fatigue for students; unoptimized, low-quality turnout for organizers.

TWO-SIDED MARKETPLACE STAKEHOLDERS

DEMAND SIDE: THE GOAL-ORIENTED SENIOR

- *Context:* Facing imminent corporate placement and graduation pressure.
- *Core Friction:* Wasting valuable attention filtering out first-year social notifications.
- *Core Need:* An automated eligibility filter that delivers direct utility.

SUPPLY SIDE: THE OVERWORKED ORGANIZER

- *Context:* Tasked with driving high-quality registrations for technical events.
- *Core Friction:* Blasting massive, multi-batch networks results in low conversions and community frustration.
- *Core Need:* A structured distribution gate to reach verified, eligible candidates.

The Strategic Solution Architecture

MVP Scope & Prioritization (MoSCoW Matrix)

MUST HAVE

- Student Profile Setup [SSO Data]
- Structured Organizer Data
- Clean Dynamic Chronological Feed
- Native App Roster Export Workflow

SHOULD HAVE

- AI Recommendation Prediction Engine
 - Deferred to lower initial code complexity and compute overhead

COULD HAVE

- Performance Analytics Dashboards
 - Replaced in V1 via simple manual CSV downloads to save engine time

WON'T HAVE

- Peer-to-Peer Community Discussion
 - Avoids management overhead and diluting product value prop

User Journeys & System Logic

STUDENT WORKFLOW

1. AUTHENTICATE
 - Log in via campus SSO
 - Validate identity
-
2. DATA CAPTURE
 - System pulls major , Grad year , & live CGPA
-
3. THE MATCH GATE
 - Core engine pairs info
 - Generate zero spam

ORGANIZER WORKFLOW

1. STRUCTURED CREATION
 - No free form text
 - Multi-Select items
-
2. MANDATORY GUARDRAILS
 - Required CGPA slider
 - Exact expiration clock
-
3. ALGORITHM ROUTING
 - Database queried
 - Targets feed natively

Interactive Prototype & Live Matching Proof

THE STUDENT FLOW

9:30

Let's build your zero-noise feed"

Step 1 of 2

1. Department :

Computer Science and Engineering

2. Graduation Year :

4TH (Senior Graduates)

3. Current Cumulative CGPA :

8.45

4. Interests Chips :

SDE Internships

Data Science

Core engineering

Generate My feed →

Generate

- SSO-Driven Profile
- Sticky Feed Filter Indicator

TRANSPARENCY CARD

Post Successful! Surfaced to 412 matching eligible Senior Undergraduate feeds instantly. Zero general spam generated.

Routed to 412 Eligible Profiles

Data-Driven Success Metrics Framework

METRIC TIER (SYSTEM LEVEL)	TARGETED INDICATOR (What We Track)	OPERATIONAL PURPOSE & STRATEGIC LOGIC
★ NORTH STAR METRIC	Monthly Successful Applications Completed Natively	Tracks actual marketplace value delivery rather than empty vanity traffic or surface clicks.
🛡️ ENGAGEMENT GUARDRAIL	DAU / WAU Stickiness Ratio	Measures routine user check-in habits during peak campus hiring and placement seasons.
📢 PROVIDER CONVERSION	Average Registration Conversion Rate per Post	Total native sign-ups divided by Total native sign-ups divided by efficiency value to organizers.

Growth & Cold-Start GTM Strategy

SUPPLY-SIDE INJECTION

1. The Onboarding Concierge
 - Manual scraping of public notices 2 weeks prior to day-one launch.
2. Immediate Value Seeding
 - Pre-populating database with 30+ premium senior-tier career opportunities.
3. Organizer Administrative Value
 - Onboarding top 3 societies via automated applicant roster CSV/Excel export utility.

DEMAND-SIDE ACCELERATION

1. The Placement FOMO Window
 - Direct launch synchronization during high-stakes campus hiring seasons.
2. Institutional Distribution Lock
 - Official Mock-Test schedules routed exclusively through native app CTA buttons.
3. Target Liquidity State
 - High-intent student density forces clubs to migrate natively to retain talent pool.

Multi-Year Sustainability & Talent Lifecycle Strategy

AUTOMATED PROFILE PROGRESSION: Background SSO data engine drives zero-friction data updates.

PHASE 1: EARLY SEMESTERS

- Internal Club Recruitments
- Orientation Onboarding
- Low-Stakes Engagement

PHASE 2: MID SEMESTERS

- Technical Fellowships
- Hackathons & Competitions
- Regional Skill Workshops

PHASE 3: FINAL SENIOR

- Corporate Placement Matching Engine
- High-Stakes Career

SUSTAINABLE ECOSYSTEM MATRIX: \$0 CAC Flywheel scaling automatically across historical student batches
